CONTENTS FOR

Heat Transfer—Japanese Research

Volume 20, Nos. 1–8, 1991

Number 1

1 Vaporization Behavior of a Single Droplet Impinging on a Heated Surface with a Flame-Sprayed Ceramic Coating
Takayoshi Takano and Kiyosi Kobayasi

18 Convective Heat-Transfer Enhancement by a Corona Discharge
Akira Takimoto, Yukio Tada, Yujiro Hayashi, and Kazutoyo Yamada

36 Liquid Film Formation on a Rotating Disk
Taku Ohara, Yoichiro Matsumoto, Hideo Ohashi, Norio Shimamoto

56 Local Heat-Transfer Characteristics of a Cylinder Placed Downstream of and Perpendicular to a Single Row of Cylinders
Ikuo Mabuchi, Masaya Kumada, Munehiko Hiwada, and Etsuo Hasegawa

72 Experimental Study of the Critical Heat Flux in a Narrow Vertical Rectangular Channel
Masanori Kaminaga, Yukio Sudo, Youji Murayama, and Tohru Usui

86 Side-Wall Effects on the Transmittance of Radiative Energy through a Three-Dimensional Packed Bed
Kazuhiko Kudo, Hiroshi Taniguchi, Yong-mo Kim, and Katsuhiko Miyosi

Number 2

97 Heat Transfer and Skin Friction of a Flat Plate Turbulent Boundary Layer Disturbed by a Cylinder
Hiroshi Suzuki, Kenjiro Suzuki, Yoshihito Kikkawa, and Hiroshi Kigawa

113 An experimental Investigation of Oil Influence on Heat Transfer to a Refrigerant inside Horizontal Evaporator Tubes
Suguru Yoshida, Takashi Matsunaga, Hai-Ping Hong, and Makoto Miyazaki

130 Heat-Transfer Mechanism of Liquid Film Flow in a Vertical, Finely Grooved Heating Surface
Masaki O-uchi, Masaaki Izumi, Norio Yamakawa, Yasuo Takamori, and Toshiro Takeyama

144 Heat-Transfer Performance of a Corrugated-Tube Thermosiphon. Part. 1. Evaporator Performance
Kanji Negishi, Ken-ichi Kaneko, Takayoshi Matsuoka, Masao Hirashima, Yuuji Nishikawa, and Masakazu Taguchi

Heat Transfer—Japanese Research

Volume 20, Nos. 1–8, 1991

Number 1

1 Vaporization Behavior of a Single Droplet Impinging on a Heated Surface with a Flame-Sprayed Ceramic Coating
Takayoshi Takano and Kiyosi Kobayasi

18 Convective Heat-Transfer Enhancement by a Corona Discharge
Akira Takimoto, Yukio Tada, Yujiro Hayashi, and Kazutoyo Yamada

36 Liquid Film Formation on a Rotating Disk
Taku Ohara, Yoichiro Matsumoto, Hideo Ohashi, Norio Shimamoto

56 Local Heat-Transfer Characteristics of a Cylinder Placed Downstream of and Perpendicular to a Single Row of Cylinders
Ikuo Mabuchi, Masaya Kumada, Munehiko Hiwada, and Etsuo Hasegawa

72 Experimental Study of the Critical Heat Flux in a Narrow Vertical Rectangular Channel
Masanori Kaminaga, Yukio Sudo, Youji Murayama, and Tohru Usui

86 Side-Wall Effects on the Transmittance of Radiative Energy through a Three-Dimensional Packed Bed
Kazuhiko Kudo, Hiroshi Taniguchi, Yong-mo Kim, and Katsuhiko Miyosi

Number 2

97 Heat Transfer and Skin Friction of a Flat Plate Turbulent Boundary Layer Disturbed by a Cylinder
Hiroshi Suzuki, Kenjiro Suzuki, Yoshihito Kikkawa, and Hiroshi Kigawa

113 An experimental Investigation of Oil Influence on Heat Transfer to a Refrigerant inside Horizontal Evaporator Tubes
Suguru Yoshida, Takashi Matsunaga, Hai-Ping Hong, and Makoto Miyazaki

130 Heat-Transfer Mechanism of Liquid Film Flow in a Vertical, Finely Grooved Heating Surface
Masaki O-uchi, Masaaki Izumi, Norio Yamakawa, Yasuo Takamori, and Toshiro Takeyama

144 Heat-Transfer Performance of a Corrugated-Tube Thermosiphon. Part. 1. Evaporator Performance
Kanji Negishi, Ken-ichi Kaneko, Takayoshi Matsuoka, Masao Hirashima, Yuuji Nishikawa, and Masakazu Taguchi

158 Heat-Transfer Performance of Corrugated-Tube Thermosiphons. Part 2. Condenser Performance
Masao Hirashima, Yuuji Nishikawa, Masakazu Taguchi, Kanji Negishi, Ken-ichi Kaneko, and Takayoshi Matsuoka

169 Laminar Forced Convection Heat Transfer in Eccentric Annuli
Kenjiro Suzuki, Janusz S. Szmyd, and Hiromasa Ohtsuka

184 Numerical Simulation of Radiative Heat Transfer to High-Pressure Turbine Nozzle Vanes of Aeroengines
Kazuhiko Kudo, Hiroshi Taniguchi, Masami Kawasaki, Ken'ichi Funazaki, and Shoichi Obata

194 Development of a Dual-Mode Cascaded Thermosiphon
Ikuro Shishido, Yukio Suzuki, Kazufumi Watanabe, and Mutsumi Suzuki

Number 3

203 Turbulent Forced and Free Convection along a Vertical Flat Plate (Opposing Flow)
Terumi Inagaki and Kenzo Kitamura

217 Experimental Study on Thermophysical and Kinetic Properties of the $LaNi_5$-H_2 System
Atsumasa Yoshida, Yasuhiro Naka, and Tsutomu Ohkita

230 Field Investigation on Heat Transfer in an Urban Canyon
Atsumasa Hoshida, Kazuhide Tominaga, and Shigeru Watatani

245 Steady Solidification of a Liquid on a Moving Wall with Forced Convection
Eiji Hasegawa and Junichi Yamada

260 Natural Convection Heat Transfer in the Separation Region of Backward-Facing Step
Toshiyuki Misumi and Kenzo Kitamura

274 Study of Turbulent Heat-Transfer Enhancement by a Turbulence Promoter Placed in a Turbulent Boundary Layer
Masatomo Hori, Junzo Yata, Tatsuo Minamiyama, and Kenji Yamaguchi

291 Investigation of Annular Liquid Film Flow in Tubes with Helical Ribs and Wires (Suppression of Dropolet Entrainment with the Aim of Improving Evaporative Heat Transfer)
Sadahiro Namie and Koki Shiozaki

Number 4

307 An experimental Study of Thermal Radiation at Cryogenic Temperatures
Toshiyuki Amano and Akinori Ohara

324 Three-Dimensional Nonsteady Heat-Transfer Analysis of an Indirect Heating Furnace
Hiroyuki Ito, Yoshito Umeda, Yasuhisa Nakamura, Tetsuo Watanabe, Takaaki Mizutani, Norio Arai, and Masanobu Hasatani

339 Development of a Continuous Vacuum Dryer for Highly Viscous Liquid Foods
Eitaro Kumazawa, Yukihiro Saiki, Kazui Ido, and Morio Okazaki

357 Effect of Suction through a Slit on Forced Convective Heat Transfer
Katsuo Komori and Terumi Inagaki

368 Heat Transfer from a Cylinder in a Porous Medium Subjected to Axial Flows
Shigeo Kimura and Hiroyuki Nigorinuma

376 Heat Transfer in the Melting Process of Phase-Change Materials around a Horizontal Single Pipe and a Heat Exchanger with Horizontal Pipes Connected by a U-Bend
Michio Yanadori and Takashi Masuda

389 Some Considerations on Physical Heat Pipe Models for Analyzing Dynamic Heat-Transfer Characteristics
Masashi Kuramae and Makoto Ito

Number 5

407 Enhancement of Saturated Nucleate Pool Boiling Heat Transfer by Ultrasonic Vibrations
Akio Nakayama and Matsutaro Kano

418 Effective Thermal Conductivities of Discontinuous and Continuous Solid Systems
Makoto Tanaka and Fumitake Chisaka

429 Miniature Optical Fiber Sensor Used to Measure Local Void Fractions
Shigeru Hinata, Masayuki Sakurai, Masaru Nakazawa, J.E.S. Venart, A.S.M. Sousa, and B. Zhou

441 Effects of Bundle Depth and Working Fluid on the Optimized Fin Geometry of a Horizontal Low-Finned Condenser Tube
Shigeru Nozu and Hiroshi Honda

458 Heat-Transfer Coefficients in an Agitated Vessel with a Perforated Screw Mixer
Toshiyuki Kobashi, Teruo Takahashi, and Yoshiro Kitamura

467 Skew Upstream Differential Schemes for Three-Diumensional Fluid Flows (An Application for Air-Conditioning Problem)
Satoru Kotoh and Goro Yamanka

484 A Proposal on the Wall Shear Stress for Turbulent Natural Convection along a Vertical Flat Plate
Terumi Inagaki and Katsuo Komori

496 Heat-Transfer Control by Electric Fields in Turbulent Pipe Flow with a Gas-Solid Suspension
Hideo Yoshida, Taisei Komuro, and Ryozo Echigo

Number 6

511 Numerical Simulation of Electron Behavior and Beam Heating on a Material Surface
Kazunori Shioda, Yoshio Hashidate, and Mikio Kumagai

525 Time-Current Characteristics and Minimum Fusing Current of R-113 on a Horizontal Wire
Masao Fujii and Masaki Ikeuchi

537 Cavitation Effect on Heat Transfer from a Circular Cylinder in a Conduit
Hideo Kimoto and Shinya Kitano

549 Natural-Convection Heat Transfer from Two Horizontal Cylinders in Vertical Alignment
Turumi Inagaki and Katsuo Komori

560 An Analysis of Cooling Curves Accompanying Phase Transformation for Various Diameters of Steel
Mamoru Tajima, Tadasu Maki, and Kozo Katayama

569 Infinite Prandtl-Number Convection in a Cube Heated from Below
Shigeo Kimura

579 Thermal Analysis by the Finite-Element Method Considering the Temperature Change of Fluid along a Path
Takehiko Yanagida, Kanbara Takatsugu, and Asabuki Hiroshi

590 The Effect of a Coating Material on Minimum Film Boiling Temperatures
Yoshihiro Kikuchi, Takuya Nogaki, and Ryuichi Matsumoto

602 On the Performance Limit of Closed Two-Phase Thermosiphons
Tatsuhiro Ueda and Tohru Miyashita

Number 7

619 Study on the Heat Transfer of Heat Exchangers for the Stirling Engine. Part 1. Heat Transfer in a Heated Tube under the Periodically Reversing Flow Condition
Mitsuo Kanzaka and Makio Iwabuchi

632 New Numerical Method for Combined Convective-Radiative Heat-Transfer Problems
Toshio Miyauchi, Toshio Itonaga, Masahiro Hirano, and Yoshikazu Takahira

646 Development of a Modified Single-Blow Method—An Application to Parallel-Plate Heat-Transfer Surfaces
Yoshinao Yagi and Sadanari Mochizuki

656 Basic Cooling Characteristics of Perfluorocarbon Liquid Immersed Windings for Nonflammable Transformers. Part 1. Disk Coil Cooling for Large-Capacity Forced Circulating Transformers
Haruyuki Yamazaki, Takeshi Sakamoto, Isao Takagi, and Keizaburo Hawashima

668 A Variational Principle for Thermally Coupled Problems between a Solid and Fluid. Part 2. On Thermally Coupled Problems of Unsteady Natural Convection Flow
Hiroshi Kamegaya, Naoki Asano, and Ryoji Ishiguro

686 Heat-Transfer Characteristics of Latent Thermal-Storage Units with Sodium Hydroxide–Based Molten Salts
Katsuhiko Kanari, Yoshiyuki Abe, Kotaro Tanaka, Yoshio Takahashi, Ryuji Sakamoto, Masayuki Kamimoto, and Takeo Ozawa

700 Thermal Radiation Properties of Molten Salts (Properties of Alkali Metal Nitrates)
Toshiro Makino, Takahide Maeda, Manabu Edamura, and Atsumasa Yoshida

711 Thermal Radiation Properties of Molten Salts (Properties of Alkali Metal Chlorides and Conductive-Radiative Transfer in the Salts)
Toshiro Makino, Takahide Maeda, Takashi Yasuo, and Atsumasa Yoshida

Number 8

723 Heat-Transfer Characteristics in Two-Phase Double-Tube Thermosiphons
Hideaki Imura and Masamichi Yoshida

734 Heat-Transfer Augmentation due to Recirculating Flows behind Blocklike Structures
Tooru Ishikawa and Tamotsu Kamiya

750 Heat-Transfer Simulation in a Furnace for Steam Reformer
Kazuhiko Kudo, Hiroshi Taniguchi, Kehui Guo, Takao Katayama, and Takahiro Nagata

765 Unsteady Laminar Natural Convection Heat Transfer in an Enclosure with Conducting Plates
Kengo Sasaguchi, Tetsuhiro Uemura, and Hiroyuki Takeo

782 Investigation of Annular Liquid Film Flow in Tubes with Helical Ribs and Wires
Koki Shiozaki and Sadahiro Namie

793 Heat Transfer by Condensation at a Steam-Water Interface in a Horizontal Channel
Akira Murata, Eiji Hihara, and Takamoto Saito

805 Liquid Motion in Saturated-Pool Nucleate Boiling by Interfering Bubbles
Akio Nakayama and Matutaro Kano

816 Contents for Volume 20, Nos. 1–8, 1991
